

# Iulian Sebastian Oprea

Junior Programmer

## LANGUAGES

- Rumanian | Native
- Spanish | Native
- Catalan | Native
- English | Medium - Advanced

## ADDITIONAL INFO

Car license ( B license )

## HOBBIES

- Formula 1
- Software Developing
- Simracing

## CONTACT

**Phone :** +34 642 668 905

**Email :**

iulianoprea14@gmail.com

**LinkedIn:**

## ACADEMIC INFO

- 09/2022 - Present ( 3r Year )  
Universidad Rovira i Virgili | Tarragona  
**Degree in Computer Science**  
Designed the Operating System GarlicOS  
Front + Backend Web about programming articles
- 09/2020 - 05/2022  
INS Candelera | Ametlla de Mar  
**High School Science and Technology ( Bachillerato in Spain )**  
Research project with note 10
- 09/2016 - 06/2020  
INS Candelera | Ametlla de Mar  
**Compulsory Secondary Education ( ESO in Spain )**

## SKILLS

- Languages : C, JAVA, HTML, CSS y ARM, Python
- Frameworks : Bootstrap
- Data bases: MySQL | PostgreSQL | MongoDB

## ABOUT ME

My name is Iulian Sebastian Oprea, but my friends call me Iulian. I'm a Computer Science student, and I started programming with an Arduino Mega, where I built my own replica of a Formula One steering wheel.

As I mentioned, I am currently studying Computer Science, which I've found fascinating ever since I was a kid. I've always been the person that people called when they had problems with their personal computers, even at school, where I often helped teachers solve issues with their screens.

Now through getting my degree I've learned several programming languages and discovered the incredible potential of coding, how a simple program can make life easier and more productive in just a few steps. Now I am excited about participating in projects that are used by many people and have a real impact.
